Mines and Prospects--Furnaces and Mills

Wabash of Park Has Its Head Up

Condition of the Company's Properties in Big Camp Undergoing Significant Changes.

While the management of the Wabash of Park City is not prepared to exploit a strike the condition underground is a most assuring one and affords greater encouragement than at any period since the search for pay dirt was inaugurated on the 600-footlevel, sald Montague Ferry, who has never doubted the merits of the undertaking, last night. Discussing a change to which the market has gradually responded until yesterday, when It flew up to 65 cents, leaving a sorry lot of shorts at the pole. Mr. Ferry said that the company desired to say rothing more than that the condition at this time is a most satisfactory on with the outlook quite encouraging. Fo some time, in the fissure which is bein prospected, stringers and benches a ore of good quality have been occur ring, and that the company has persevered in the work is the best evidenc of its belief that shead of it is an or bedy that shall fully reimburse those who have reached into their pursess a it became necessary to continue the who have reached into their purses as it became necessary to continue the prosecution of the work. That there has been, as "the street" insisted during the day, a strike however, Mr. Ferry denied, and he is as eager for it, perhaps, as are any of the shareholders. Meanwhile, there has been the change at the New York, which coccupies a position on the same zone, to encourage interests in the Wabash and if it has gotten away from the man who has been waiting on the morrow for "cheap stock," and is distressing the oracles who have shorted it from time to time, they have themselves only to reproach. Not a person in Park City, nor a mining man in the State but will rejoice with Wabash on its improved outlook.

GOT INTO GOLDFIELD.

Ex-Senator Parsons and Colorado As sociates Land a Prize.

As a result of recent investigations a Coldfield, Hon. Charles C. Parsons counsel for the Boston Con. of Bing ham and others, has, with his associ ates, founded the Goldfield-Monarch Mining company, its estate consisting of no less than 140 acres of gold-hearing territory that has as neighbors some of the most prominent of the camp's conclave of sensational products. While conditions at the Monarch are identical with those in the other locations, with fissures and cross-fissures cutting through it, the company, said Mr. Parsons, will undertake no systematic development until it has procured patentis for which the required work is now being done. The acquisition of 140 acres of mineral-bearing ground in the marvelous camp involved no trifling sum, but the purchase price was an item in the transaction that Mr. Parsons would not divulge. ates, founded the Goldfield-Monard

CHARM TO SHIP.

Southern Proposition to Come Forward With More Gold Rock.

Shipments from the Charm mine in the Drum district, out of Leamington, are to be resumed, said Manager J. D. Clive, vesterday, the next or to be forwarded as soon as it is possible to procure teams with which to do it. The last lot of ore sent in from the mine was sold for \$39.75 per ton, the contents consisting entirely of gold, and that as much will be received for three carloads now at the surface the management has no doubt. The rock is very silicious and on the last con-signment a charge of \$17 was exacted. However, more liberal treatment is now promised, and with it it is hoped that production may continue steadily that further development may be prosecuted on a group in which much terest has long been manifested

RECOVERS THE VEIN.

Important Development Takes Place at Galena King Mines.

At the Stockton properties of the Galena King Mining company, according to advices from there during the day, the faulted channel which got away from the management a short time ago, has been recovered and with it a good body of lead carbonates, disseminated with galena. Into this the level has been extended for several feet and there is nothing to indicate other and there is nothing to indicate other than that it will show as great strength as does it at the point at which it was lost. Meanwhile, the usual volume of one is coming to the smeiters, with everything favorable to an increased output before the close of the year. Clark Knight, manager of the properties, left for the properties, left for the properties, left for the properties again yesterday morning to rush the work.

Tonopah-Goldfield Stocks.

Wednesday's transfers on the San Francisco board were recorded as they follow Builfrog, 1909 at 51c; Red Lion, 2009 at 6c; Jumbo Extension, 650 at 516;50c; MacNamara, 250 at 25765c; MacNamara, 2500 at 25765c; Montana-Tonopah, 360 at 31,706;1675c; New York, 220 at 12c; Paymaster, 110 at 3c; Rescue, 150 at 130 bc; Tonopah, 250 at 31,12c; Vernal, 1500 at 11c; Mohawk, 160 at 15c; Jumbo, 1700 at 50 565c; Red Top, 1600 at 11c; Midway, 1900 at 250675c.

Horn Silver Ores

Sample of Rock Tells Its Own Tale-Heavy Shipments From the Carisa Ledges.

Since November 1 the management of the Carisa has reported at the furnaces of the Bingham Con smelter with no less than twenty carloads of ore, said Mr. Joseph on his return from that Tintle producer yesterday. While the greater portion of this ore has been of secondcines, he added, the latest settlement with the smelter shows a margin of over \$10 per ton, while the first-class ove compares favorably with the best that comes from that camp, so that the story being put forth by the shorts that an assessment is more probable than a surplus, if not a dividend, may be dlembased as baving the usual 'foundation.' Development along the new channel encountered on the seventy-five-foot level, subsequently twenty-five feet below and finally on the 13-foot level, has been with most satisfactory results, and a consignment of this ore is now on the way to the smelter. With the earnings from the second-class ore with which to more than pay for the expenses of the campaign underground, the earnings from the ship-smade may be relied on as so much need to the company, and Manager Joseph is to be congratulated on present conditions down thems.

A sample of ore increated with horn sliver, with which Mr. Joseph returned, indicates the presence of very rich rock in the company's Shy ground, although the management declined to discoss it until further work had been done in that locality Mr. Joseph and that while he was unable to verify the report that a strike had been made in Beck Timuet, his observations and not been extended beyond the dump. class, he added, the latest settlement

GOLDFIELD'S PROGRESS.

Nevada Camp Continues to Add to Big Record of Strikes.

The News, telling of conditions at Gold-

field. Nev., says:

The Gold Bond Mining company has been incorporated to operate the Tinhorn group of five claims, favorable mention of the development of which has been made several times in these columns. The officies are: R. L. Mayfield, banker of Shreveport, La., president; W. H. Clark, capitalist, of Sait Lake City, vice-president, W. F. Bond, broker of Goldfield, secretary and treasurer. Ten men, under the direction of Superintendent A. H. Crampton, are now at work on the property. Two sharfs are being sunk and a large amount of good-grade milling ore is on the dump. The owners are very much encouraged over the showing.

Returns were received this week from a shipment of forty-seven sacks from the Richard & Co. lease No. 9 on the Jumbo. The smelter settled at the rate of \$456 per ton for the lot.

The new ledge recently cut in the Janary is holding its own and a zend a gentle.

ton for the lot.

The new ledge recently cut in the January is holding its own and a good quantity of high-grade ore is being taken out daily. The crosscut at the 25-foot level has entered the ledge, but the values have not been determined yet. The lessees are also stopping at the 190-foot level.

Another shipment of rich ore went out

stoping at the 190-foot level.

Another shipment of rich ore went outfrom the Oddie-Gardner lease on the Kendall this week. There were about ten tons of ore and the assays from the different sacks showed values tanging from 1700 to 1900 per ton. The new shaft, which is being sank on another ledge which has not been heretofore exploited, is going down at the rate of six feet per day. The whoie shaft is now in high-grade milling ore.

A strike which has been kept quiet was recently made on the lease of Woodward, Lothrop & O'Keefe on the Florence. Theore runs from 8500 to 8000 per ton and the lessees now have about fourteen tons sacked for shipment.

GLAD THEY'RE COMING.

Cincinnati Investors Will Be Cordially Received in the Park. That certain Cincinnati interests in the

saly West of Park City have finally deided to make systematic and expert inventory of the company's present resources, will meet with the approval of sources, will meet with the approval of every interest in this neck of the woods, and certainly nothing will be done to prevent its being an exhauntive one. The Cucinnatt shareholder is now indeed, about to do what he should have done a long time ago. That he has suffered so acutely, indeed, is that he was infrenced too largely by others who "linew" as little as did by. That the market value of his investment has undergone a shrinkage so damaging is due to greater extent to the slarms that were sent out by the shorts of the East, than to any infirmity at the properties, the actual condition of which could make the actual condition of which could make been been befored at any time, at little expense. The rush to unload was what did the damage. Meanwhile the company continues to pay better than 31 per cent on \$14 stock, while should the dividend be reduced to 25 cents it would still be carriing 2) per cent on that investment That the committee is to send an expert to the properties is information that will be cordailly approved by every mining man in this greana. All they ask is that he so able to qualify as an expert niner and that his qualifications be not confined to those of a mining expert. very interest in this neck of the woods,

IN BUHL CHUTE.

Remarkable Development Since the Channel Was Encountered.

The wealth of the Buhl channel in the properties of the Henerine company at Stockton continues to increase. Since it was tapped on the 200-foot level the management has driven in it along the strike a distance of 105 feet, and yet there is nothing to indicate the end of it. After driving for eighty-five feet upon it the fasure, which cuts north and south across it, was encountered. Through this a hole was punched and on the east of the fissure the channel has been followed for as many as twenty feet. Superintendent Raddatz, who came is from the Last vesterday, after seeing the big'show at St. Louis, and after having communicated with the foreman of the mines, says of the development that it exceeds all expectations, and to the resources of the behings adds enormously in the East he met not a few whose moneys have been invested in the camps of this State and, as a rule, they are satisfied lie will lepart for camp again on Monday. agement has driven in it along the strike

Here to Inspect the Utah Copper

Officials of the Company Arrive on Private Car and Proceed to Bingham in the Night.

To inquire into the wealth of the mines, the efficiency of the new mill with which another record is being shaken out the present month, President Charles M. MacNelli and Treasurer Spencer Penrose of the Utah Copper company came in from Colorado during the afternoon and in a private car departed for Bingham at 6:20 last night to remain forty-eight hours or more. With the record for October, during which the new plant settled down to the achievements of an adult, the visiting officials are very much pleased, the settlement sheets denoting gross earnings approximating \$100.000. gross earnings approximating \$190,000. During their sojourn the visitors with Vice-President Wall and Manager Jackling, will take up a number of matters that appeal to them and it is not unlikely that the development of ores from a new opening and in a pornot unlikely that the development of ores from a new opening and in a portion of the company's domain hitherto unexplored, will be inaugurated. This, of course, has reference more particularly to territory adjoining the properties of the Ohio Copper company, which is traversed by the rich ledge in All's Well ground. The addition of another unit to the mill will also be considered by the visitors, who are accompanied on their pilgrimage by Director Swench of New York and his wife, Harry Blackmen of the Denver & Southwestern railway and wife. wife, Harry Blackmen of the Denver & Southwestern railway and wife.
Of conditions in Colorado Mr. Mac-Neill says they are much improved. All the mills of the United States Reduction and Refining company, of which he is the general manager, are in operation, as is the smelter operated by it at Canyon Clify, while the supply of cre from all sources has shown a material increase since the restoration of peace in Crippie Creek. The output of the great camp of gold, indeed, is gradually recovering the normal, while conditions there are such that no further interruptions are apprehended. The visitors will remain in Utah several days.

HUNG UP STAMPS.

Mill at the Mammoth Shut Down After a Brief Run.

Unable to make satisfactory recovery from the class of ore of which about 2000 tons were put through the crushers, the nanagement of the Mammoth mill at lennitely or until such time as there is a hange in the composition of the rock. This, at all events, was the announcement made at the general offices during the afternoon and until such time as a change occurs in the ore it will be forwarded as formerly to the furnaces of the valley smelter. The clean-up at the mill it now in progress and the proceeds of the attempt, consisting of buildon and concentrates, will be sent to market in a few days. The record at the offices shows that since November I the management has reached the smelter with as much ore as was delivered during the entire month of October and the output promises at the end of the month to show astonishing sains. At a depth of 2100 feet in the proporties the new level is now being hurried by Superintendent Mcintyre to connection with two known one channels, and results are awalted with much intest by the miners of that district, as an important lesson on conditions at that depth is expected. President Mcintyre, who has been tucking away his long-horns on the Nevada ranch for the winter, is scheduled to arrive from the West today. This, at all events, was the announce

SAW THE BIG FAIR

The Utah Mineral Exhibit Won First Place on Its Merits.

President Jacob Moritz of the Little Chief Mining company has returned after a visit to the St. Louis exposition, and says that while the effort to comprehend the entire show is decidedly wearing or the energies, he was fully compensated. The mineral exhibit from this State was The mineral exhibit from this State was not only as picturesque as any in the collection, but it was undoubtedly the most instructive, said Mr. Moritz, and under the supervision of Commissioner Whittaker was exploited to the best possible advantage. He was the right man, indeed, for the place, said Mr. Moritz, with considerable forvor. All were cordully received by him, while the Utah building with him as the host was always cos; and homelike.

AT GEYSER-MARION

First Clean-Up From Run on Tailings Quite Satisfactory.

Col. T. C. Wiswall, representing the freene Reduction company, by whose methods of milling the reclamation of the old Geyser-Marion of Mcreur has been undertaken, is in the city with the been undertaken, is in the city with the proceeds of the first clean-up at the plant, and with them is very much pleased. He has not yet began to draw upon the ores of the oid moperty, said he yesterday although they have been recently sampled by the secretary of the company, and this may follow at a later day. The plant, cautipped with the new process, will continue on the tailings, of which there is a very large volume. With conditions at this time he is very much cleased. HEADED FOR NEW ORES.

Management of Grand Central Hastening to Its Lower Connections.

From the lower level of the Grand Cenral of Tintle the management is now forging its way with all possible dispatch to a connection with the big channel of wealth that was opened above and which was followed by winze below the 200-foot level to a place that left no doubt of its level to a place that left no doubt of its continuity, no doubt of the permanency of its riches, said a local interest yesterday. Until the connection through the lower level is effected, however, the management, miner-like, will confine the output to present tonnages, although not a few are of the opinion that a more libera distribution will be made next month.

At Silver Peak.

At Silver Peak.

Seventeen miles northwest of Goldfield.
In the Silver Peak mining district, W. F.
Bond & Co. J. H. Allen and J. G. Brown
have a group of five claims—the American
Boy, List Chance, Silver King No. 1.
Silver King No. 2 and Silver King Fraction, says the Goldfield News. The ledge
on the American Boy opened up by a series of open cuts shows ore for a distance
of 256 feet on the surface. The ore goes
from 350 to 3109, the values being in gold,
silver and copper. On the Silver King fine
lead ore has been opened up, two assays

showing 69 per cent and 75 per cent lead. showing is per cent and a per cent lead. Samples of the ore brought to the office of W. Bond & Co. have attracted considerable attention. A force of men, under Superintendent Allen, will start work immediately, and the owners expect to extract enough ore in addition to what is on the dump, to make a shipment within a week or ten days.

Profit Taking at Boston.

BOSTON, Mass., Nov. 18 -- While the local market was very active and fluctuations in some Issues broad, there was come irregularities to be seen. The gen-eral list, with the exception of Hingham. was inclined to sell off some, but the net lasses were not of much importance. Froilt-taking was very much in evidence and commission-houses were free solters, but on the decline good briging orders were met Hornblower & Weeks, heckers, 51 State street, Boston, and 10 Wall

Ore in Silver Dipper.

indicates a strike in the tunnel by which the Sliver Dipper group is being opened up, the disclosure consisting of a foot or more of ore running well up in copper and silver, with some gold. The property, from which some ore of good quality has been sent to the smelter, is located across the canyon from the Columbus Con, and arrangements are now being made for steady work.

Mining Notes.

N. K. Miller, under whose direction the development of the Haron group at Alta is progressing, is down from camp much pleased with conditions there. He has good ore exposed in the Huron tunnel and hopes to be able to begin active production next season.

John F. Rober, a veteran mining man, is up from the Rapid Transit mines in Arizona. Mr. Rober in his boyhood days was engaged in mining in Nova Scotia with Hop. David Keith among his neighbors. He will probably locate permanently in Utah.

Manager Tony Jacobson of the Columbus Con is expected from that Alta bonanza today.

W. W. Armstrong has returned from Park City, where he reports the livelest interest in developments at the New York, of which company he is the treasurer, and in which he reports the ore body all that has been represented, whatever the attitude of the talent. Mining circles will regret sincerely to learn of the illness of his son with appendicitis, he having removed him to the hospital during the day. H. F. Quint, representing the Metals Construction company, came in from Boston yesterday, with Los Angeles as his destination. Mr. Quint will return to Utah after an absence of about ten days. John Thompson, master mechanic at the Daily West, is down from Park City again.

W. J. Lawrence, manager of the Scot-tish Chief of Park City, has returned from camp, to be followed by a consign-ment of ore.

Solon Spire, who has been visiting his many interests at Park City, is back rom camp.

A. Hanauer, Jr., has gone East for a two weeks outing.

The management i the May Day of Tintle reached the Pioneer sampler during the day with two carloads of high-grade ore and a corresponding amount of second class. Capt. Henry Stern, having concluded

his observations among the properties of the Tintic Mining and Development com-puny, and at the Yampa smeiter, has gone East, to return at a later day. Frank Morehouse, manager of the Mex-ico Mining and Snelting company's prop-crites, is back in the anddle, after an ill-ness of averal days, according to advices from the southern republic.

George Guan, the American Smelting and Refining company's field representa-tive, is back from the diggings again. The management of the E. & F. com-pany's properties out of Pioche, Nev., marketed another lot of ore yesterday on controls showing 6.4 per cent copper and 29 ounces silver per ton.
